THE HUMAN HEALTH RISK ASSESSMENT METHODOLOGY FOR ROCKY FLATS ENVIRONMENTAL
TECHNOLOGY SITE - SGS-582-94

Action: Review and comments

The enclosed "Human Health Risk Assessment Methodology" is intended to compliment the Rocky Flats Risk Assessment Template developed by the Department of Energy, Rocky Flats Field Office, Environmental Protection Agency and the Colorado Department of Public Health and Environment. The entire baseline risk assessment process for the Remedial Investigation as negotiated for Rocky Flats Environmental Technology Site is documented and explained.

Please review and comment on the methodology at your earliest convenience. We have received a request that the methodology be included as an appendix to the "Cleanup Work Plan" (CWP) currently under negotiation. It has also been proposed that the methodology be attached with the "Rocky Flats Risk Assessment Template". In order to avoid confusion in the CWP, due to overlap between the documents, sections in the methodology which are presented in the template will be deleted and a reference to the template inserted.

Please direct any comments or questions on the Human Health Risk Assessment Methodology to Win Chromeco of the Environmental Restoration Program Division/Risk Assessment. Win can be reached on extension 8641 or digital page 5144.
